

WOODLAND PARK SPECIAL ROAD DISTRICT
ROAD MAINTENANCE/REPAIR
PROJECT OUTLINE

PROJECT: Old Korral

OUTLINE:

The gravel surface of Old Korral has been compromised. In identified areas, the existing gravel has been grated off the road surface into the ditch areas, making it not recoverable, resulting in bare dirt areas.

Dust Abatement: the dust while driving is extreme and, in some cases, causes driving hazard due to thick dust cloud giving limited vision

Recommendation of the Board:

Place gravel/repair surface on identified sections of Old Korral. To be continued yearly for maintenance. To be determined as budget allows.

Investigate Dust Abatement products and costs. It is possible that the road surface grating and dust abatement can be done in one project if cost effective.

Approval of Recommendation:

Cost:

Estimated Cost:

WPSRD Funds Approximately \$ 1000.00 annually Actual Cost: \$

Donated Equipment:

In Kind Donation \$

Volunteer Hours:

 In Kind Donation \$
Total Project Estimate \$ Actual Total: \$
